

PDS Stats Installer

Stats Installer Release package contains 2 installation versions:

Stats Installer - Autostart will install a version of the PDS Stats which will start the Stats Collector automatically whenever PDS is started.

Stats Installer - Manual will install a version of the PDS Stats which will add a Stats Collector menu item to the Plugin Menu.

Both installations will add a **Stats Reporter** menu item into the Plugin Menu.

It is recommended that the Autostart version is installed if notification of unused or redundant items etc. is considered valuable.

**NOTE - After Installation, Close the installer and manually start PDS.
Do not start the application from the installer as it may lockup the PDS IDE.**
